Dear FCC:

XM Radio effects millions of people, I am one of them. I have used XM Radio for over two years now. It is a great asset in the fact that it allows me to be able to choose my favorite radio stations and not worry about taking my hands off of the steering wheel as I drive out of the normal FM areas. I am also assured that much of my programming is commercial free, which does not leave me to search for another station as I drive down the interstate at 75 miles an hour. I recently visited Denver, and because of the XM Instant Traffic & Weather, I was able to find out about a accident on I25 and avoid the bunch up of traffic. The XM Instant Traffic & Weather also allowed me to know that it was going to rain on my way out to Denver, and cancel my golf appointment at my next rest stop, instead of waiting until I got there, and being very upset. I hope that you will reject the NAB's petition to end these services to the public, they are a huge benefit to the public and are greatly appreciated. Thank you for your time.

Sincerely,

Landon Brunner
